

Rawad Zeidan

Date of birth: 13/08/1999 | Place of birth: Lebanon | Gender: Male | Nationality: Palestinian (Autonomous Palestinian Territories) | Phone: (+961) 71778700 (Mobile) | Email address: rawad.o.zaidan@gmail.com | Passport: 5220406 | LinkedIn: [rawad-zeidan](#) | Whatsapp Messenger: +96171778700 | Address: Lebanon (Home)

Education & Training

Master of Science in Applied Artificial Intelligence | University of Hull | 26/05/2025 - Current | Hull, United Kingdom

- **End-to-End ML Pipelines:** Engineered full-lifecycle Machine Learning solutions, from data ingestion and feature engineering to deployment of supervised, unsupervised, and Reinforcement Learning models.
- **Statistical Modeling:** Applied Bayesian inference and probabilistic modeling to quantify uncertainty and enhance decision-making accuracy in non-linear engineering contexts.
- **Technical Stack:** Architected production-ready AI using **PyTorch, TensorFlow, and Scikit-learn** with specialized experience in cloud deployment (AWS/Azure) and edge device optimization.
- **Strategic Communication:** Leveraged high-level technical synthesis (IELTS 8.5) and data visualization to communicate ROI and operational impact to non-technical stakeholders.

Field(s) of study: Engineering, manufacturing and construction | Level in EQF: 7

Bachelor of Science in Biomedical Engineering | Lebanese International University | 04/10/2017 - 21/09/2021 | Saida, Lebanon

- **Medical Device Prototyping:** Designed and prototyped diagnostic instrumentation, focusing on biosignal acquisition (ECG, EEG, EMG) and medical imaging analysis.
- **Engineering Analysis:** Applied biomechanical modeling and systems-engineering principles to analyze human physiological systems and fluid mechanics.
- **Computational Modeling:** Leveraged **MATLAB**, Python, and CAD for advanced simulation, circuit analysis, and microprocessor interfacing.
- **Regulatory Affairs:** Managed project lifecycles with a focus on **FDA/CE marking** pathways, bioethics, and patient data privacy standards.

Level in EQF: 6

Work experience

Biomedical engineer | Medilab S.A.L. | 18/12/2023 - Current | Beirut, Lebanon

- **Technical Procurement & Tender Management:** Spearheaded the technical evaluation of vendor proposals and authored specialized tender specifications for high-value diagnostic systems. Conducted market research and cost-benefit analyses to inform procurement decisions, ensuring 100% compliance with international regulatory standards (ISO/CE).
- **Installation & Clinical Training:** Directed the end-to-end installation and site-acceptance testing (SAT) of complex medical devices. Designed and delivered technical training programs and user manuals for clinical staff, optimizing equipment operation and minimizing user error.
- **Diagnostic Engineering & Maintenance:** Leveraged advanced diagnostic tools and root-cause analysis to resolve critical equipment failures, reducing downtime for high-volume hospital environments.
- **Software Development & Process Automation:** Engineered internal software tools and scripts using **Python and AI frameworks** to automate routine diagnostic tasks and logistics. Developed centralized database solutions for tracking asset lifecycles and maintenance schedules, improving departmental efficiency through real-time monitoring of equipment uptime.

ICT teacher secondary school | Codebrave | 11/10/2021 - 30/11/2023 | Beirut, Lebanon

- **Curriculum Development:** Designed and executed a comprehensive STEM/ICT curriculum for youth (12–17), specializing in Python, JavaScript, and Robotics (Arduino/Microcontrollers).
- **Technical Operations:** Managed full-scale ICT lab infrastructure, overseeing hardware maintenance, network security, and the implementation of GDPR-compliant data privacy protocols.

- **Process Automation:** Engineered custom digital tracking tools and automated reporting systems using Excel/scripting, significantly reducing administrative overhead for NGO reporting.
- **Strategic Alignment:** Ensured all educational content met Lebanese Ministry of Education (CRDP) standards and international Child Protection (CP) safety guidelines.
- **Resource Management:** Directed technical procurement and donor coordination to scale coding programs and ensure sustainable equipment lifecycles.

Monitoring and evaluation officer | Education Planet Association, NGO | 06/04/2017 - Current | Saida, Lebanon

- **Framework Design:** Developed and managed M&E frameworks, logical models, and performance indicators to track the progress of educational programs and literacy initiatives.
- **Data Oversight:** Designed digital survey tools and conducted field data collection to measure student learning outcomes and teacher performance.
- **Impact Analysis:** Analyzed qualitative and quantitative data to produce comprehensive reports for donors and stakeholders, ensuring transparency and accountability.
- **Program Improvement:** Identified bottlenecks in program delivery and provided evidence-based recommendations to optimize classroom interventions and resource allocation.

Skills

Technical | Microsoft Office | think analytically | CAD software | Python (computer programming) | ISO-9001 | prepare presentation material | principles of artificial intelligence | adapt teaching to target group | MS PowerBI Desktop

Soft skills and management | engineering principles | project management | work as a team | communication | manage project information | create solutions to problems | Englisch (C2)

Language Skills

Mother tongue(s): **Arabic**

	Understanding		Speaking		Writing
	Listening	Reading	Spoken production	Spoken interaction	
English	C2	C2	C2	C2	C2
French	A2	A2	A2	A2	A2

Certifications

Professional Certification in Data Engineering | SE Factory | Hybrid | 26/11/2023

Engineered a high-performance **end-to-end ETL pipeline** that aggregated over **5,000+ job listings** from multiple platforms into a centralized data repository using **Python, Selenium, and BeautifulSoup**. Architected scalable cloud solutions by migrating relational databases to **AWS S3** and utilizing **AWS Lambda** for serverless data processing. Demonstrated technical mastery in **SQL, PostgreSQL, and Pandas** to transform raw data into actionable insights, bridging the gap between complex data architecture and business intelligence.
